Free trash bags for everyone!

TiksPac recycling stations with free trash bags are strategically placed around the municipalities in areas such as walking paths, parks, recreational areas and other frequently visited areas. The recycling stations blend naturally into the environment, inviting all passers-by to grab a free trash bag and contribute to keep the community clean. We keep the community clean, in cooperation with the public, municipality and local businesses.

Municipalities

A clean municipality is a safe municipality

Keeping the local environment clean brings only benefits. Clean areas are much more likely to stay that way, and are considered much safer. Working together, we make our city and municipality an even more pleasant place to live.

Our trash bags are also free for the municipality. The municipality is responsible for keeping the bags available at the recycling stations. This is made possible by businesses that pay to promote their brands at the stations.

Businesses

Environmentally smart exposure in an environmentally friendly setting

Advertising at the recycling stations gives businesses unique exposure at cost-effective prices and lets the businesses demonstrate their corporate social responsibility (CSR).

Their logos are visible to anyone passing by the recycling stations, as well as those who stop to take a bag.

A sustainable solution

Littering is one of society's greatest problems today. It's harmful to people, animals and nature, disturbs the oceans, pollutes the environments and makes areas less safe. It's expensive for society and its citizens, and it's completely unnecessary.

Most people agree that littering is wrong, and concern for the environment is growing all over the world. Our free trash bags make it easy for anyone to pick up their trash - and maybe even some left behind by others.

Together we can make a difference

Citizens, businesses and municipalities together

The public cleans

The public is given an easy way to take care of their waste, using our free and readily available trash bags.

The business community pays

Businesses buy exposure at the stations, while at the same time demonstrating corporate social responsibility (CSR).

The municipalities facilitate

Municipalities set up the recycling stations and are responsible for ensuring the constant availability of trash bags.
